

# Hydration Station

In an effort to further promote municipal drinking water, and to cut down on single-use plastic water bottles, the City of Stratford has a new mobile water station available for local community events.

The Hydration Station is a portable unit that can be used at outdoor functions in Stratford where there are no water fountains. It is simply hooked up to a municipal water connection, and fresh, clean water is made available through drinking fountains and water bottle fill taps on the front.

Here are the requirements for use of the Hydration Station:

- The event must take place in Stratford, within City limits
- Minimum event attendance of 100 people
- The event must be open to the public
- The event must be at least four hours in length
- Hydration Station must be placed in a prominent location, approved by City staff
- A suitable water connection must be available
- The unit will be available from May 1 until the Thanksgiving weekend

The Hydration Station is made available for free to events that meet the criteria above. Scheduling is done on a first-come, first-serve basis by contacting the City of Stratford Water Division at 519-271-0250 ext. 315, or by email at [mmortimer@stratford.ca](mailto:mmortimer@stratford.ca)

With the exception of sporting events, outdoor events taking place on municipal property will request the unit through the [Special Event Application](#).
